

**datango and Nimbus collaborate to accelerate adoption of Nimbus' solutions**

**Partnership will increase user adoption of Nimbus Control and enhance Nimbus' client education and services offering**

**Berlin, Germany & London, UK, November 11, 2009: datango AG, the leading independent provider of software that accelerates time-to-value and increases user acceptance of mission-critical systems, today announced that it had forged a partnership with Nimbus, a global company that provides business process management software to help organizations improve performance, efficiency and compliance through better process management, understanding and communication.**

Through the partnership, Nimbus will leverage the datango performance suite as the technology backbone of its user enablement solution for Nimbus Control. In addition, datango and Nimbus will co-operate on sales and marketing activities in order to provide a more complete solution to mutual clients.

Speaking about the partnership, Adrian King, Chief Operating Officer of Nimbus, said, "As we continue to serve large organizations that deploy our software more deeply across their businesses, it is crucial that we ensure that this pervasive use is adequately supported and that best practices are also promoted. Through our partnership with datango we have selected a technology partner that will allow us to effectively address this requirement and deliver a comprehensive and effective solution to our customers that will ensure that they realize maximum value from their Nimbus investment."

Stephen Walsh, Executive Vice President, Business Development of datango, comments, "This partnership makes sense for three key

reasons. First, it brings our technology to Nimbus in order to ensure greater use of their software by their clients. Second, it drives our software earlier into the project for the deployment or update of a significant application such as SAP and this maximizes the value that may be derived from the datango performance suite. Third, by working together, we're able to provide a more complete solution that addresses the broader implications of a process-led change event and this represents greater value and security for our mutual clients. As a leader in their field, I'm delighted that we are able collaborate."

**About Nimbus Partners:**

Nimbus is a global software company that provides business process management (BPM) applications to help companies and public sector bodies improve performance, efficiency and compliance. Headquartered in the UK, Nimbus has offices in 10 countries. Since its inception in 1997, Nimbus has helped over 700 organizations including AstraZeneca, Barclays, Chevron, HSBC, JP Morgan, Nestlé, Philips, Shell, Toyota and Unilever. It is a trusted business partner amongst its clients and has been recognized by several industry awards including the Deloitte Fast 50. Nimbus' flagship product, Nimbus Control allows clients to capture, manage and deploy operational processes and supporting information to all of their people wherever they are, across the web or on a mobile device, delivered either on premise or as software as a service (SaaS). Nimbus is a Microsoft Gold Certified Partner (ISV), an SAP Software Partner, an Oracle Partner and a Salesforce.com Partner.
